

Stelnet, as foundational member of CONSEN (EEIG) will introduce the concepts about CONSEN Community, activities and the IP-2329 project CEPEMIS, in the **2003-IST Information Society Technologies** event that will take place in **Milan on 2-4 October**, in partnership with **SMAU**, one of Europe's largest ICT events.

The presentation is in the **Session 302 of the 2003-IST Networking Area**, and titled **"CONSEN OPEN DIGITAL ECOSYSTEM"**

CONSEN is the Open Pan-European Info-Space Community interactive for establishing an IST Innovation and RTD environment in continuous expansion.

Nowadays, 40 CONSEN members are promoting the formation of the CONSEN EEIG (European Economical Interested Group) for having more flexibility, union, force and sectoral representation.

This CONSEN EEIG formed by 40 members and 168 partners basically SME IST, creates the starting knowledge pool that acts as Technical and Service Providers, Content Producers and local integrators of the CONSEN info-spaces, projects and activities, and necessary for standards, test-bed for applications and developments and user assessment.

CONSEN provides knowledge updates for digital innovators and related business initiatives.

CONSEN allow SME to interact in an IST habitat sharing information, ideas, resources, works, research for creating innovation and RTD innovation.

CONSEN integrates Pan-European multidisciplinary organizations, SME, RTD centres, universities, local developers, consultants and governments mainly. This wide variability and high complexity give more stability, increasing the hardness, strength and solidity of the IST community eco-system.

This month, CONSEN will present an big, long and ambitious EU-FP6-2002-2 IP-2329 Improving Risk Management proposal, with the intention of opening a new opportunity for Europe for leading this are of the IST and reduce the gap existing with our competitor in RDT.

This project CEPEMIS Civil and Environmental Protection CEP European Multi-Risk Info-Space.

The aim of CEPEMIS is establish an CEP Info-Space where technician, expert, SME, NGO, Corporation, University organisms can interact for sharing data and applications, investments, knowledge, lexicons, thesaurus, methodologies and technologies, for doing to low cost sophisticated applications securing and protecting the information.

Several new RTD lines, visions and innovations will be introduced in this project: as the newest Spaces and Ambient

Intelligent for improving the risk management, helping and supporting the take of decisions, the process guided by logical operations, natural cascades actions recommendations, the knowledge auto-improvement, management of experiences, lessons learnt and global similar cases, ... , Open-Solution for coordination and integration of local data and applications, marketing technical of PULL Community Innovation for expansion, ...

Project Office with news roles and actor: PROMOTER, TECH-ADVISORS, LOCAL ADAPTER, PROJECTS COORDINATOR,...

All interested organism are invited to join, in profit of all because in the CONSEN ecosystem when major is the interaction major is the positive output done as exothermic reaction, than it needs a critical mass for starting the process

CONSEN offers to their members, mainly:

- Specific Information, Formation; Knowledge and Innovation in high advanced IST technologies;
- Business, Innovation and Technological opportunities;
- Support for participating in Euro-project direct/indirectly;
- Use, develop, learn, Test-bed and Exploitation of CONSEN info-space infrastructure;
- Offers and tenders for providing to CONSEN technical and expert services.

What is CONSEN (EEIG)? is the initiative for forming a non-profit Trans-European e-community interested in participate and cooperate in RTD IST and CONSEN activities, doing an Important Industrial European Force. Nowadays is very active participating in events and preparing projects for reach the funds necessities for its formal foundation.
